4	Public Consultation and Discussion Process of Carbon Fund and ER-PIN Finalitation.	Samarinda, April 21 st , 2016
	Purpose of the group discussion	<ul style="list-style-type: none"> 1. To build positive dynamic and constructive 2. Can get final result of giving option and contribution for East Borneo ehich is low emission.

No	Consultation Process	Date & Place
	Expected outputs of the grup discussion	
	Summary of discussion process	<p>This meeting for one important point, on the contexts of climate changing, some climate change agreement, for one public communication in ER-PIN is arranged in FCPF framework, so that can be agreed by participants. This year it will do ER-PIN, if ER-PIN be agreed will continue to ER-PD. ER-PIN should be done transparently and partisipatively . ministry of Environment and Forestry who have task to arrange all of this.</p> <p>Developments in the region can be integrated into regional and center voices. Discussion is not only the ER-PIN, even beyond ER-PIN, the benefits of sharing with friends. In the direction of 2018, the preparation of Readiness in the case of the crabon fund needs to be truly understood and jointly implemented and there are several more steps, how to concerate on the sector that must be integrated. For the good coolabortaion, there are some cooperations between DDPI and P3SEKPI.</p>
	Participants	<p>P3SEKPI, DDPI of East Borneo, L3S of Mulawarman University, GGI, TNC, GIZ GELAMAI CeBERS of Mulawarman University, WWF, East Borneo Province Plantation Servise, Governor Expert Staff For Environment and Natural Resources, TES D of Mulawarman University, GAPKI, POKJA REDD+ Berau, Menapak, Kerima Puri, Serumpun, GIZ Forclime, B2P2EHD Pokja REDD+ TKHL Kukar, C3S Mulawarman University, Expert Staff of the Governor for Environment and Natural Resources, Balikpapan University, STABIL, Earth Foundation of East Borneo Province, Plantation Agency of East Borneo Province, Environment Agency, East Kutai Regency Forestry Office, Bappeda of East Borneo Province, Wehea Indigenous Head, East Borneo Provincial Economic Burreau, Bioma, Forestry Faculty of Mulawarman University, 17 Agustus 1945 University, Aman of East Borneo, Balitek KSDA.</p>
5	Minute of Meeting	Bogor, May 18 th – 20 th , 2016
	Purpose of the grup discussion	Priority needs to be given to activities that will take precedence with respect to the value of the remaining fund approved by the KPPN.
	Expected outputs of the grup discussion	
	Summary of discussion process	<p>The meeting was motivated by a budget that did not fit between the previously desined budget and the decrease in funding from the Ministry of Finance. Therefore, activities will be focused first on more urgent activities. The initial budget is estimated at Rp. 4,622,290,000 to 2,902,837,000. For the remaining 1.7 M funds, a letter from the World Bank has been issued which will urge the Ministry of Finance to keep the 1.7 funds that have not gone down . priority activities include : ERPD and Readiness package.</p> <p>Alternatively, workshops can be held in conjunction with the safeguard agenda. Matching between CF workshop activities with other activities, such as socialization. The most effective way of mainstreaming is to start REDD activities into the RPJMD drafting process, starting now. Other districts that have not done so can be used as a focus on mainstreaming and socialization. Dishut or Bappeda can act as a coordinating agency. In addition to the RPJMD, another alternative, CF is included in the sectoral strategic plan. The obstacle</p>

No	Consultation Process	Date & Place
		faced was ERPD being completely submitted. But if waiting for national must keep moving so that ERPD continues to run.

6	Socialization SRAP REDD+ Revision and Integration in Preparation of City/District Construction In East Borneo	Samarinda, June 2 nd , 2016
	Purpose of the group discussion	To inform some presentation about national and international policy relate with REDD+ and preparation of Carbon Fund
	Expected outputs of the grup discussion	
	Summary of discussion process	<p>For the first presentation have presented by Prof. Dr. Mustofa Agung Sardjono, themely update national – international relate to REDD+, SRAP of East Borneo Integration into RPJMD. The second by Dr. Fadjar Pambudhi, themely Mrv : how to measure achievement reduction emission in sectoral program. The third by Rahmina, SH, themely (safeguard : Environemntal and social safeguards for REDD+). The fourth by Muhammad Fadli, M.Si, themely (direction of REDD+ implementation from the presentation and discussion the first section have the results.</p> <p>Revision that carried out is response to policy and factual condition. Many national law product have impacts to area and must be address together and solve the problem together. Very important contribution to repairenvironment condition (involved in the discussion of the policy plan, RPJMD, KLHS Coastral Road Plan). Ther are policies and guide have not yet implementation. Need specific effect, environment data and to policy making. As holytic refer construction plans.</p> <p>For second section, the presented by Dr. Tri Wahyudiyati (P3SEKPI – FCPF) themely Mainstreaming Carbon Fund in attempt emission reduction from deforestation and degradation. Prof. Daddy Ruhiyat (DDPI) themely stakeholders role to support REDD+ program in East Borneo through Carbon Fund. Centre just refer taht fund has channeled directly to areas and in DDPI or Governor who have given. ERPD will more complete and more concern to each sectors, this is to preparation ahead.</p>
	Participants	
7	Socialization FCPF of Carbon Fund Program	Samarinda, June 2 nd , 2016
	Purpose of the group discussion	To understanding for the district mainstreaming
	Expected outputs of the grup discussion	
	Summary of discussion process	<p>Incentive scheme for the success of reducing emissions from deforestation and forest degradation and conserving forests, whose main purpose is to improve the welfare of the community while saving natural forests. Indonesia needs to participate in a carbon fund integration with low emission development strategies (Green Growth). Provide integrated REDD+ application learning in the field.</p> <p>Multi stakeholders active involvement (community, private, etc). CF programs incentives for regions. Other regencies susch as PPU, Paser, Kaltara never heard</p>

No	Consultation Process	Date & Place
		of activities in the district other than Berau. Never heard of REDD working groups in other districts at the local government level; it is difficult to be at the level of politics and bureaurats. Berau district's success stories can trigger other districts.

11	Discussion of KPH Readiness in the Implementation of the Carbon Fund Program and KPH Support Needs	Samarinda, August 5 th , 2016
	Purpose of the group discussion	
	Expected outputs of the group discussion	
	Summary of discussion process	<p>Initially the KPH numbered 34. Then officially the FMU to be formed in East Borneo became 20 KPH + 1 Tahura. 21 KPHs are categorized into two, namely operational FMUs and FMUs that have not been operational. Organizational development in FMUs, especially in the area. There are currently 5 resorts in Meratus KPH, because these 5 resorts are considered too large, then they are divided into 10 resorts. All resorts have no PNS personnel, new foresters (3people / resorts).</p> <p>Policies for resort charging (structure at the resort), it is estimated that 7 people are needed for each of the independent resorts and BLUDs (business plans and business operations), business plans can be assisted by NGOs and others.</p> <p>Business plans inside and outside certain areas in the FMU.</p> <p>There needs to be a Task Force team, which will formulate inviting strategies for many parties. Need to sort needs : 1. Hardware; HR, infrastructure, budget, 2. Software : facilitation, business plan, capacity building.</p>
	Participants	
12	Preparation of Self Assessment Methodology	Jakarta, September 1 st , 2016
	Purpose of the group discussion	To assess readiness in REDD+ implementation
	Expected outputs of the group discussion	
	Summary of discussion process	<p>FCPF is an initiative from two large components, donor and participants in contacts to help the developing countries in prepare reduction emission and CF when output can be succeeded. Three steps that is negotiated : ERPIN, ERPD, ERPA</p>
	Participants

25	Minutes of Discussion of FCPF World Bank Letter of Intent with KLHK	Jakarta, February 10 th , 2017
	Purpose of the group discussion	<ol style="list-style-type: none"> 1. As a from of commitment between the two parties between the government of Indonesia and the Carbon Fund World bank of Indonesia. 2. To implement a GHG emission reduction program under the reduced emission from deforestation and degradation (REDD+) program in East Borneo as part of the national REDD+ program.
	Expected outputs of the grup discussion	
	Summary of discussion process	<p>Lol is an agreement on commercial cooperation based on equality and brings benefits to both pasrties and does not interface with the independence of a country. There are no legal clauses between the two parties that apply. Lol is governed by british law commonly used for International agreements. The Lol must be signed by both parties by March 22nd, 2017 the Indoensian government representative who will sign the Lol is the Ministry of Finance by stating that the implementing agency is the Ministry of Environment and Forestry.</p>

No	Consultation Process	Date & Place
		<p>The Lol applies only 2 years before the Emission Reductions Payment Agreement (ERPA) is prepared. Lol is not an emission reduction credit sale and purchase agreement but is only commitment of two parties to implement but is only a commitment of two parties to implement a REDD+ program, while an agreement on the utilization of the resulting emission reduction (carbon credit) from the REDD+ program will be set forth in ERPA.</p> <p>Through the Lol, the World Bank wants to ensure that the parties to utilize the carbon credits included in the maximum contract category in point 1.1 before ERPA is agreed. The World Bank will prepare a revised draft of the Lol in accordance with the results of the Lol discussion on February 10th, 2017 and will be sent to the Indonesian representative again for later processing of the signing to the Ministry of Finance.</p>
	Participants	<p>Representatives from P3SEKPI, PI mitigation directorate, sectoral and regional SD mobilization directorates, MRV directorate general director of PPI, forestry directorate of Bappenas, ministry of Finance, and WB. Involved WB lawyers in Washington DC via teleconference.</p>

	Participants	
28	Minute of Meeting (World Bank Mission)	May 15 th – 26 th , 2017 Places : - P3SEKPI office – Bogor - PPI diretoral general office – Jakarta
	Purpose of the group discussion	Discussion progress of FCPF program additional Fund include the process of signing Lol.
	Expected outputs of the grup discussion	
	Summary of discussion process	The Indonesian side still objected to the darft Lol that had been drafted. By signing the Lol, Indonesia will surrender ownership of the title, rights and interest for reducing REDD+ emissions to the World bank. The possibility of negotiating again, (so that credit from REDD+ activities is still owned by the national), given the limited time. There are considerations for signing the Lol. On May 17 th , 2017 have been held the meeting for World Bank mission that have been available to addition new clause. World bank convinces the Ministry of Environment and Forestry. World Bank have discussed ToR PMU, ToR Coordinator, ToR procurement expert, and ToR Advance policy. Readiness package must explain the using of 5 million USD. Priority program need assessment readiness gaps, and rationale. R package must followed by SESA document and ESMF. R package must be communicated on June 30 th and endorsed by World Bank on July 28 th 2017.
	Participants	Representative of P3SEKPI, Representative of PPI, Representative of World Bank Washington DC, Representative of World Bank Jakarta.
29	Meeting for discussion about Letter of Intent FCPF Carbon Fund Program	Samarinda, June 13 th , 2017
	Purpose of the group discussion	9. To communicate directly latest development of FCPF Carbon Fund Program, about Letter of Intent (Lol) to East Borneo. 10. To communicate and give detail information about FCPF Carbon Fund activities.
	Expected outputs of the grup discussion	3. Agenda discussion with World Bank about readiness package will be sent. 4. ERPD can be continued in September 5. The draft can be agreed in December 2017 6. From finance minister has not finished agreeing on financial matters.
	Summary of discussion process	After discussion for Indonesia's position is very strong, then agreed Lol draft. On the last draft have been agreed by minister of KLHK by world bank and Norway. The draft will be brought on May 20 th to communicate and defend Lol position. World bank expect East Borneo can go on in Paris, then Nur Masripatin, Harry Bastaman and Bambang Suprianto will go and communicate about this. For the last changed of terminology credit carbon to be changed to performance based payment. Lol is made before Paris Agreement (PA). At least 94% East Borneo can be national.

30	Preparation and Writing of the Forest Carbon Partnership Facility – carbon fund	Samarinda, July 10 th – 16 th , 2017

No	Consultation Process	Date & Place
	(FCPF – CF) / One on One Meeting Emission Reduction Project Document /ERPD	
	Purpose of the group discussion	<ol style="list-style-type: none"> 1. Conduct discussions and consultations with the key resource persons from various sectors to obtain input on proposals and information on emission reduction activities. 2. Discussion with Bappeda related to regional Medium Term Development Plan (RPJMD) in the future (2018-2023) so that the proposed FCPF activities of the Carbon fund Program can be synchronized with governor activities. 3. Discussion of emission reduction programs specifically the integration of Forest Management Units (KPH) in ERPD documents and their role with other OPD activities.
	Expected outputs of the group discussion	To support the preparation of the forest carbon partnership facility (FCPF) emission reduction document (ERPD) document.
	Summary of discussion process	<p>The East Borneo government and the Ministry of Environment and forestry have completed several steps needed to be able to access the funding, including by compiling and sending documents on emission. Reduction Project Idea Note (ERPIN) which are working papers for emission reduction activities planned by East Borneo to support the national program. The ERPIN has received approval from the World Bank and is currently preparing the Emission reduction Project Document (ERPD) document which is a more detailed document that will explain various technical and non-technical aspects as stipulated in the drafting guideline ERPD provided by the World Bank. From the results of One on Meeting there have been emission reduction activities in each sector that will also be included in the 2018-2023 RPJMD document in order to obtain the budget from the Provincial Regional Budget (APBD) East Borneo. In addition, from the results of the discussion it was also known that in supporting the success of the FCPF, the Carbon Fund program in the future required policy support both for each sector or cross-sectoral policy, for example regarding safeguards.</p>

	Summary of discussion process	<p>In the review Carbon Accounting process, we can assess performance from East Borneo province, such as we have been discussed, beginning that error occurred in determination of deforestation. Average emissions from deforestation rather different than national, we enter RIL-C. For deforestation of conservation forest, protected forest and other usage areas.</p> <p>There is emission from degradation 919,942 tCO₂/y. Logging the first issue is data. We have 2010-2014 data, but until now the data need to get, while we use proxying, looking for broad felling relationship with RKT, but if there are data from 2004-2010 from forestry service can improve, emission from logging 7,8 million tCO₂/year in reference 2004-2016 periods. For peat fires have changed, emission from the peat fire is 922,989 tCO₂/year. For mangrove have been changed, because there is peat and on mineral. Potential emission is 415,6 tCO₂ when the conversation happened.</p> <p>Emission from mangrove soil in 2014-2016 periods is 3,965,153 tCO₂/y. FREL East Borneo is 38,9 million tCO₂/y. Contribution of emission from mangrove soil is 9%, logging 20%, peat decomposition 3%, forest degradation 3%, deforestation 63%, peat fire 2 %.</p> <p>The result MRV review, processing in area of preparation process have carried out through discussion with PEMDES, IUP, Farmers group, IPPKH, Social Forestry, IUPHHK. Deforestation of performance assessment area (WPK) is 6,5 million ha, degradation WPK 2,23 million ha, mangrove soil WPK 166,409 ha, peat decomposition WPK 60,555 ha, peat fire WPK 164,879 ha. The quite a large activity of degradation just in protected forest, conservation forest which is issued concession licensed area and APL nature forest in 2016 (national), RIL-C in production forest (HPT, HPK 2016 of East Borneo. It should prepare transparent information and consistent in framework method should meet the indicators.</p> <p>Emission risk index aim to choose the priority area to actions of decrease emission and to check progress whether units have success to drop off risk level.</p> <p>For FREL allocation which depends on how the emission. There is scientific basis that is the point to increase in manage planning better. With historical, how to decrease emission should be done. That is depending on the available budget.</p> <p>Every year environmental services East Borneo arrange of PEP, by Government's decree can make working group, land sector, energy sector, waste sector and industry sector.</p> <p>Discussion about monitoring and reporting :</p> <ol style="list-style-type: none"> 1. 	Compilation of Follow Up Steps, SRN, MRV, Safeguards and FGRM, and BSM.	
	Purpose of the group discussion	Produce significant steps that need to be taken in order to support the implementation of the FCPF Carbon Fund program in East Borneo.
	Expected outputs of the grup discussion	
	Summary of discussion process	<p>Desaign has been made by the private sector is also one of the beneficiaries. Several discussions have been conducted with APHI regarding the amount of benefits that will be obtained later. The incentives obtained are not the form of money (Non Fiscal). There are several systems that will be managed by the sub-national. For the potential of carbon trading, it is still in the strage of reviewing which will then be arranged accordingly to be applied in Indonesia, currently being worked on the energy and industrial sectors.</p> <p>REDD+ is an SFM concept in the global order. Philosophically there is nothing new but instrumentally considered new because there are additions. In the sub-national level (compiling performance on Frel, to maintain related institutional management. So what value will emerge at the site level. 90 % of which is derived from the national level will be managed as it is, which needs to be discussed in the team.</p> <p>National SIS management function are clearing hose, reconciliation, processing. Functions of sub-national SIS managers are sub-national clearing house, collection and verification, processing, storage. There are 7 principles inhandling complaints : consistent with the objectives of the national forestry program, transparent and effectives forest governance, respecting the rights of the indigenious people and local communities, full and consistent stakeholder participation.</p>

53	The Formulation of The Sustainable Planation 2018 Socialization	Sangata, September 25 th , 2018
	Purpose of the group discussion	
	Expected outputs of the grup discussion	
	Summary of discussion process	<p>Sustainable plantation development is the development of plantations that is held sustainable by taking into account economic, social, cultural and ecological aspects. Development and drivers of deforestation and degradation have been identified, one of which is the plantation sector. If manged properly the plantation sector can contribute to the reduction of carbon emissions in East Borneo by 57%.</p> <p>The role of the green growth compact as a concept of collaboration based development at the landscape level needs to be encouraged as effort to accelerate the achievement of low carbon green development towards economic transformation. Sustainable plantations talk about forests and plants, FCPF will contribute incentives as compensation for involvement in supporting low carbon development.</p> <p>Moratorium on Republic Indonesia's presidential decree No 08/2018 is a regulation of delays and evaluations of oil palm plantation permits and</p>

		<p>increased productivity of oil palm plantations that is in line with the vision of green of East Borneo.</p> <p>Evaluation and structuring of sustainable plantation permits is handled by a team consisting of the land office an dspatial planning, the economic department, the legal department, DLH and the plantation service. It still needs to be verified the utilization of East Kutai land area. Plantation permits land area of +881,661 Ha, utilited +819,446 Ha, _123,905 Ha not utilised including HCV area of +43,000 Ha in the area of plantation cultivation. It is necessary to verify high carbon value areas and conservation areas in platation permits covering an area of 107,908 Ha (2020) and +88,269 Ha of natural forest.</p> <p>The development of oil palm plantations is prioritized on non-cultivated mineral soils covering +228,81 Ha. Spatial data verification activities will be completed by the end of October 2018, which is coordinated by the land and spatial planning services of East Kutai regency.</p>

54	Minute of Meeting	Jakarta, October 9 th , 2018
	Purpose of the group discussion	<ol style="list-style-type: none"> 1. To find the best solution to reach an agreement that needs authority from parties. 2. To need additional clarification regarding portion distribution.
	Expected outputs of the grup discussion	
	Summary of discussion process	<p>A statement apperead stating that the distribution of benefits at the site level neede more detailed explanation, an explanation of the clarification regarding the percentage of benefit sharing.</p> <p>Three points about basis that make rules must be a procedure. This draft has followed the plot. Law product is needed East Borneo from Ministry of Environment and Forestry, because every Indonesia’s rules product must set it up.</p> <p>Main concern, chapter 17 opens 3 options to G01 states three authorities in carbon credit that is the entity program agreement deals with the developers involved in REDD+ of the BSM contects. Moibilisasi’s presentation that is a grant (inline with ER tile), and BPD LH directly to east Borneo. ERPD made in the form of FCPF state is centralistic. The extent to which the central government can make direct agreements with REDD+ contributors. One thing that will be discussed tomorrow is to strengthen Indonesia’s position in the ER title.</p> <p>Measure performance, there is a zero deforestation nee to be rethought related to reward. More detailed discussion is needed regarding the profit sharing simulation after the luch session. Distribution of 5% is only from authority. It is a bit difficult to determine the criteria of performance. We can use a 20% and 80% approach it is necessary to find a reference why use 20% and 80%. It does not become a single reference and needs to think about the long term.</p>

	the grup discussion	
	Summary of discussion process	<p>The one of policy to support Green East Borneo program that is the issuance of East Borneo Regional Regulation No. 07 of 2018 concerning sustainable plantation development. The sustainable planation construction is development of planation that is done sustainably with pay attention economic, social culture and ecology aspects.</p> <p>Black campaign from the European Union about the influence and effect of palm oil in International market. In East Borneo is currently being initiated the establishment of the sustainable plantation communication forum. In this from involving multi stakeholders related to aspects of sustainable plantations. Benefit Sharing Mechanism (BSM) is being built, which is an incentive for related parties based on performance that has succeeded in reducing GHG emission in the FCPF – Carbon Fund program.</p> <p>Challenges and oppurtunities for sustainable plantation development include : the problem of increasing plantation productivity while still taking into account the carrying capacity of teh environment and its sustainability. Commitment by the parties in guarding the program for handling climate change and carbon emissions. Involvement and coordination with all participants for sustainable planation contruction.</p> <p>For Paser regency, according to land cover data in 2017, the existing natural forest converse an area of 65,879 Ha, an embedded plantation of 188,069 Ha, gardens and mineral land (shrubs) that have not be cultivated for 85,105 Ha (prioritized for plantation expansion).</p> <p>The benefit mechanism which will be received by multi-policy of FCPF –Carbon fund is agreement together through pastisipasive and transparation) and can be felt until site level.</p>

56	Writing Workshop Supporting Studies Team of ERPD PCPF Carbon Fund Program	Balikpapan, October 26 th -28 th , 2016
	Purpose of the group discussion	<ol style="list-style-type: none"> 1. To agree substances that relate four main issues in PCPF Carbon Fund program. 2. To do writing workshop to eight supporting studies ERPD PCPF Carbon Fund program.
	Expected outputs of the group discussion	<ol style="list-style-type: none"> 1. Agreed the substances related 4 main issues in the FCPF Carbon Fund program. 2. The existence of draft report of the study with results (8 studies) supporting the ERPD FCPF Carbon Fund program.
	Summary of discussion process	<p>Indonesia is unique, because it reduces emission in site level. So thet, site people must participate in the planning. The hope is local friends make data more accurate and ownership. The second uniqueness, capacity building. If it is international, then the research is only for international. Capacity building is also needed at the local level. Concern, guarantee that QA is a process. The most important that is substance, not English skills, then QA can be guaranteed. The results of the revising minutes can be sent to DDPI of East Borneo.</p> <p>Remaining that funds must be completed on November 30th 2016. So the report must be completed in November (November 15th 2016). It is expected that writing can be completed and done together.</p>

57	Minutes of Meeting Public Consultation Identification of Issue for SESA, ESMF, FGRM	Samarinda, October 29 th , 2018
	Purpose of the group discussion	To accelerate the process of arranging document and follow up into detail stage, so that direction/procedural and factual condition can find solution in this document.
	Expected outputs of the grup discussion	Can make document strengthen and it applicable in next stage.
	Summary of discussion process	<p>REDD+ started since 2005, it is need preparation to entering this program and it has to ensure that this agenda as a part of plan for provincial government. SESA needs chain of process as part of procedure from World Bank. SESA has output to reduce emission. SESA and ESMF need to address open access, through developing information system for safeguard program, so it will involving stakeholder to recheck and strengthen this part. Development for system and institution to involving multistakeholder in reduction emission program need to initiate as part of readiness/preparedness.</p> <p>World Bank approach for IPPF that there is 7 steps as procedure in grievance mechanism. Mechanism of solving problem needs to arrange align with local policy. While there is collaboration effort within KLHK and MoHA. Content of ESMF and IPPF is indicative strategic, in general as we ention framework. For further step, it is need to breaking down this strategic into detail plan.</p>
